[Contact support](#) Version 1.7.0

For version 1.7.0 of the app
Summer 2027: Session 1, June 27 to July 23. Session 2, July 26 to August 15.

Quick Start

This page gets you from an empty page to a finished session. Each step is explained in full later in the manual.

1. **Open the page.** The first time, a panel called **How to use this page** opens by itself. Read it or press **Close**. The ? beside the title brings it back.
2. **Pick the session** in the **Session:** box at the top: Session 1 (4 weeks) or Session 2 (3 weeks, with Color War).
3. **Look at week 1 on the Build tab.** The session starts with its bunks and its calendar already in: opening day, the trips, village day and so on.
4. **Fix the bunks.** Change names, grades and camper counts so they match this summer. The first letter of a bunk's name is its village. The buttons after **Add a bunk** to add one to a village in every week.
5. **Check the calendar.** On the **Settings** tab, under **Session calendar**, move anything that falls on a different day this year.
6. **Press Auto generate** in the bar under the tabs.
7. **Choose** The whole session, week by week and press **Generate**.
8. **Wait a few seconds.** A panel shows each week as it finishes. You can keep using the page.
9. **Look at the Schedule tab** for each week, and the **Tracking** tab to see that the counts are fair. Not happy? Press **Auto generate** again for a different version, or **Undo**.
10. **Save it.** Press **Download all weeks (.xlsx)**. That file is your backup, and it is how you move the schedule to another computer.

The top of the page: the session picker, and the five tabs.

The one thing to remember: the schedule lives in this browser on this computer. Download an Excel file whenever you have something worth keeping.

What is in this manual

1. What the app is, and where your work is kept
2. A tour of the page
3. How to do things by hand
4. Sessions, dates and the session calendar

5. Auto generate
6. The rules Auto generate follows
7. Settings reference
8. Saving, sharing and printing
9. Things that cannot be undone
10. Troubleshooting and questions
11. Known limits
12. Glossary

1. What the app is

The Weekly Period Schedule Builder holds the camp's period schedule: every bunk, four periods a day, Sunday to Friday, for each week of a session. You can fill it in by hand, or have the app build a week or a whole session for you and then change what you like.

It is for whoever makes the schedule: a director or a program staffer. If you are comfortable with a spreadsheet you will be comfortable here.

Where your work is kept

There is no login and nothing is sent anywhere. Everything you enter is saved by your web browser, on the computer you are using. That has three consequences.

- **Another computer, or another browser on the same computer, starts empty.** To move a schedule, download it as an Excel file and upload it on the other one.
- **Clearing your browser's site data erases the schedule.** So does using a private or incognito window, once it is closed.
- **The Excel file is your backup.** Download one before any big change, and at the end of each working session.

Session 1 and Session 2 are kept separately. Switching from one to the other does not lose either.

2. A tour of the page

The top of the page

- ? beside the title opens **How to use this page**, a short guide.
- **Session**: chooses Session 1 or Session 2. Each shows its dates.
- The five tabs: **Build**, **Schedule**, **Tracking**, **Specialists**, **Settings**.

The week bar

Week: Week 1 (6.27 to 7.2)

Download Week 1 (.xlsx)

Download all weeks (.xlsx)

Specialist schedules (.xlsx)

Upload

Start over

Auto generate

The week bar is under the tabs on every tab.

- **Week**: picks the week you are looking at. Each week shows its dates.
- **Download Week N (.xlsx)** saves the week on screen as an Excel file.
- **Download all weeks (.xlsx)** saves every week of the session in one file.
- **Specialist schedules (.xlsx)** saves a file with one tab for each program area.
- **Upload** loads a file that was downloaded from this app.
- **Start over** empties this week or the whole session and puts the session calendar back on. It asks what to keep first. See "Start over" in chapter 3.
- **Auto generate** builds the periods for you.

Build

This is where the schedule is entered and changed. Each row is a bunk: its name, grades and number of campers, then a box for every period of the week. The day headings carry the dates.

A generated week on the Schedule tab.

Tracking

How many times each bunk has each program area, for the week on screen and for the whole session. This is the place to check that things are fair. The last row, **All bunks**, adds everything up. Pointing at a number lights up its bunk and its program area, so it is easy to read across a wide table.

Version 1.7.0

The Tracking tab after a whole session was generated.

Specialists

The schedule from one program area's side. Pick the area, and each week is a grid with days across and periods down. Each box says who comes, which visit it is for them in that area (counted from the start of the session), and how many campers. When a whole village comes it is written by name: Onondaga, Cayuga, Seneca, Mohawk, Tusc or Taste. Print it for the specialist.

Weeks 1 to 4 generated. Check the Tracking tab for the totals. Press Auto generate again for a different version. **Undo** Seed 797301632

Settings

How often each program area happens and how many bunks it takes. Auto generate uses these numbers. They are saved with this schedule and go into the Excel file, so a schedule you send to someone carries its own rules.

These settings add up: the periods fit.

Program area	How often, for each bunk	Bunks at once	Bunks of one village in a day	Same visit number
Waterfront	about 2 a week		A whole village, one village at a time	
League	about O 3 C 3 S 3 M 3 T 3 a week		A whole village, set village by village. Hahani's are double periods. For Tusi the number is triathlon sessions.	
Pool	at least 1 a week, at most 2		Lessons alone for an O or C bunk: the first 2 swims. Most campers at once: 80	
Ropes	exactly 2 a session		At most 30 campers at once	
Hobbies	exactly 7 sessions in the whole session		The whole camp	
Shabbat Prep	In a village's Shabbat week: the Friday afternoon double always, and exactly 1 more single periods earlier that week Who has Shabbat each week: Week 1 ☐ O ☐ C ☐ S ☒ M ☐ T ☐ No Shabbat Week 2 ☒ O ☒ C ☐ S ☐ M ☐ T ☐ No Shabbat Week 3 ☐ O ☐ C ☒ S ☐ M ☒ T ☐ No Shabbat Week 4 ☐ O ☐ C ☐ S ☐ M ☐ T ☐ No Shabbat			
Trips	Trips and bike trips are on the session calendar below. Auto generate puts them on the schedule and builds around them; one you enter by hand on the Build tab stays where you put it.			
Athletics	at most 3 a week	3	2	☐
ABC	at most 3 a week	3	2	☒

The top of the Settings tab.

3. How to do things by hand

Enter and edit bunks

- Type in the name, grades and number-of-campers boxes at the start of a row.
- **The first letter of the name is the village.** O is Onondaga, C is Cayuga, S is Seneca, M is Mohawk, T is Tusc. A bunk named O3 is in village O. Keep each village together in the list, youngest first: the app treats bunks next to each other in a village as the ones most likely to share a period.
- **Grades** can be written the way you write them: 4th, 4th/5th, 9th. The app uses them to decide which bunks are close enough in age to share.
- **The camper count** matters at the pool, at ropes and at Yoga, which go by how many campers fit.
- **Names that start with TC** (TC1, TC2 and so on) are Taste of CSL. See chapter 4.
- The arrows at the end of a row move a bunk up or down. **Remove** deletes it and everything in its row. **Add bunk**, under the grid, adds an empty row to the week on screen.

Add bunks quickly

Above the grid, after **Add a bunk to**, there is a button for each village: **O, C, S, M, T**, and in Session 2 **TC**. One click adds the next bunk of that village (after O5 comes O6) **to every week of the session**, in its place in the list, with a starting grade and with the calendar already on its row. Type its camper count afterwards.

The camp has 27 cabins, so no week can have more than 27 bunks, Taste of CSL included. The add buttons stop there and say so.

Fill in the biggest camp (27 bunks, 15 campers each) brings every village up to its most bunks in every week. In Session 1 that is 5 Onondaga, 6 Cayuga, 6 Seneca, 6 Mohawk and 4 Tusc. In Session 2 it is 4 Taste of CSL, 3 Onondaga, 4 Cayuga, 6 Seneca, 6 Mohawk and 4 Tusc, because Taste of CSL's cabins come out of Onondaga's and Cayuga's. It also sets every bunk to 15 campers. The 15 is only a round number to plan with; nothing holds a bunk to it, and you can type the real counts over it. Bunks that are already there keep everything on their rows. It asks first.

Fill a period by hand

Click a period's box and pick an activity from the list, or type to search. Activities are grouped by program area.

Add a bunk to ☐ O ☐ C ☐ S ☐ M ☐ T A bunk added here goes into every week of the session.

Build

Pick an activity for each bunk and period, or type your own. Matching neighbors merge automatically on the Schedule tab.

Set a whole period at once (hobbies already fill everyone automatically; leagues already fill their whole village): Sunday Period 1 All bunks

Clear for on

Cleared periods are left empty and shown in yellow until you fill them again (by hand, or with Auto generate and "build around").

Bunk	Grades	#	Sunday 6.27				Monday 6.28			
			P1	P2	P3	P4	P1	P2	P3	P4
O1	3rd/4th	11	Opening Day v	Opening Day v	Opening Day v	Opening Day v	v	v	v	v
O2	4th	12	Opening Day v	Opening Day v	Opening Day v	Opening Day v	v	v	v	v

Hobbies
 AM Hobbies
 PM Hobbies
 Waterfront
 Pool
 Pool
 Swim Test
 Ropes
 Low Ropes
 High Ropes

The activity list, open. Typing narrows it.

- **Write-ins.** Type anything that is not in the list and it is kept as written. A write-in is not counted on the Tracking tab.
- **Hobbies fill everyone.** Picking AM Hobbies or PM Hobbies in one bunk's box fills that half-day for every bunk.
- **A league fills its village.** Picking League, CHL, SSL, MNL or MAL fills that period for the whole village.
- **Some activities are always double periods:** Low Ropes, High Ropes, Waterfront, MNL and MAL fill both periods of the half-day you clicked in.
- Changing one box afterwards only changes that one box.

Set a whole period at once

Set a whole period at once (hobbies already fill everyone automatically; leagues already fill their whole village): Sunday Period 1 All bunks

Pick the day, the period (or all day, morning, afternoon), who, and the activity.

Choose the day, the period, **All bunks** or one village, and the activity. Then press the button, which reads **Set for all bunks** or **Set for O village**. This is the quick way to enter a trip.

Enter a trip

Trips, Tiyuls and bike trips are on the session calendar and go onto the schedule by themselves (chapter 4). To put one somewhere else by hand, use **Set a whole period at once** with the activity Tiyul, Bike Trip or Trip for the village and the periods it is away. A trip you enter by hand stays where you put it, and the calendar does not add a second one for that village.

Clear an area, a bunk or a village

Clear for on

The Clear tool.

The Clear tool empties part of the week in one go: everything or one program area, for all bunks, one village or one bunk, on one day or the whole week, all day or one part of it. For example: Waterfront, for all bunks, on Tuesday, because of weather. It tells you how many periods it will empty and asks first.

The emptied periods turn **yellow** on the Build and Schedule tabs, so it is plain what still needs filling. A yellow period goes back to normal as soon as something is put in it. **Remove the yellow marks** takes the marks away and leaves the periods empty.

After clearing Waterfront on Tuesday: the emptied periods are yellow.

Start over

Start over, in the week bar, is the one way to wipe the slate. It opens a box that asks two things and then tells you, in words, exactly what will happen.

- **What should start over?** Just Week N, or The whole session.
- **What should be kept?** Keep my bunks (names, grades, camper counts), ticked to start with. For the whole session there is also **Keep my settings**, ticked to start with.

Either way every period is emptied and the session calendar is put back on: opening day, the trips and Tiyuls, village day, Mass Program or Color War. With **Keep my bunks** unticked, the bunks go back to the ones the session starts with. With **Keep my settings** unticked, the Settings tab goes back to the session's own numbers and calendar. Starting one week over never touches the other weeks or the settings.

Start over

What should start over?

☒ Just Week 1

☐ The whole session: Session 1 (4 weeks)

What should be kept?

☒ Keep my bunks (names, grades, camper counts).

What will happen:

- Every period of Week 1 is emptied.
- The session calendar is put back on: opening day, trips and Tiyuls, village day, Mass Program or Color War.
- Your bunks stay: names, grades and camper counts.
- The other weeks and the Settings tab are not touched.

This cannot be undone. Download all weeks first if there is anything here you might want again.

Cancel

Start over

The Start over box says what will happen before it does anything.

Start over cannot be undone. Download all weeks first if there is anything on the page you might want again.

Build around what you entered

Anything you put in by hand can be kept while the app fills the rest. Enter what you want fixed, press **Auto generate**, and choose **Keep what is there and build around it**. Only the empty periods are filled. This is also how you refill yellow periods after a Clear.

4. Sessions, dates and the calendar

Two sessions

	Session 1	Session 2
Length	4 weeks	3 weeks
Dates, summer 2027	June 27 to July 23	July 26 to August 15
Opening day	Sunday June 27. No periods; they start Monday.	Monday July 26. No periods; they start Tuesday.
Bunks it starts with	5 Onondaga, 4 Cayuga, 5 Seneca, 4 Mohawk, 4 Tusc	3 Onondaga, 4 Cayuga, 5 Seneca, 5 Mohawk, 4 Tusc, and Taste of CSL (TC1 to TC4) in week 1
Special to it	Visitor's Day, Mass Program, village day on the last Sunday, the three-day Tusc bike trip, Hobby Culmination and Packing Time	Color War, the Tusc Triathlon, village day for everyone including Tusc

Each session keeps its own bunks, schedule and settings. A session you have never opened starts from its template: its bunks, its numbers, and its calendar already on the schedule. The grades and camper counts it starts with are placeholders: change them to this summer's.

The session calendar

The calendar is everything that is not a period: opening day, the Tiyuls, the bike trips, village day (O-Day, C-Day and so on), Mass Program, Color War, Visitor's Day and the clean up. It starts as the session was in 2026, on this summer's dates.

Session calendar

Everything that is not a period: trips, Tiyuls, village day, Mass Program, Color War, Visitor's Day. Auto generate puts these on the schedule first and builds the periods around them. This starts as Session 1 (4 weeks) was in 2026, on this summer's dates. Change a line to move it, and what you set here is where it goes from then on.

What	Who	Week	Day	When	
Opening Day	Whole camp	Week 1	Sunday 6.27	All day	Remove
Tiyul	Village O	Week 2	Tuesday 7.6	Afternoon (periods 3 and 4)	Remove

Tiyul	Village C	Week 2	Thursday 7.8	Afternoon (periods 3 and 4)	Remove
All Camp Clean Up	Whole camp	Week 3	Sunday 7.11	Morning (periods 1 and 2)	Remove
Visitor's Day	Whole camp	Week 3	Sunday 7.11	Afternoon (periods 3 and 4)	Remove
Mass Program	Whole camp	Week 3	Wednesday 7.14	Afternoon (periods 3 and 4)	Remove
Mass Program	Whole camp	Week 3	Thursday 7.15	All day	Remove
O-Day	Village O	Week 4	Sunday 7.18	All day	Remove
C-Day	Village C	Week 4	Sunday 7.18	All day	Remove
S-Day	Village S	Week 4	Sunday 7.18	All day	Remove
W-Day	Village W	Week 4	Sunday 7.18	All day	Remove
Bike Trip	Village T	Week 4	Sunday 7.18	All day	Remove
Bike Trip	Village T	Week 4	Monday 7.19	All day	Remove
Tiyul	Village S	Week 4	Monday 7.19	Afternoon (periods 3 and 4)	Remove
Bike Trip	Village T	Week 4	Tuesday 7.20	All day	Remove
Tiyul	Village S	Week 4	Tuesday 7.20	Morning (periods 1 and 2)	Remove
Tiyul	Village W	Week 4	Tuesday 7.20	Afternoon (periods 3 and 4)	Remove
Tiyul	Village W	Week 4	Wednesday 7.21	Morning (periods 1 and 2)	Remove

Add a line

Back to the Session 1 calendar

Put the calendar on the schedule now

The session calendar, at the bottom of the Settings tab.

Each line says **what**, **who** (the whole camp or one village), which **week**, which **day**, and **when** (all day, morning, afternoon, or one period). To move something, change its line. You can also remove a line or add one.

- **Add a line** adds a new item for you to fill in.
- **Back to the Session 1 calendar** (or Session 2) undoes your changes to the calendar.
- **Put the calendar on the schedule now** writes it onto every week. It only fills empty periods. Auto generate does the same thing before it builds a week.

Moving a line does not move something that is already on the schedule. Clear the old one on the Build tab, then press **Put the calendar on the schedule now**.

What the calendar holds to start with

Session 1	When
Opening Day	Week 1, Sunday, all day
Onondaga Tiylul	Week 2, Tuesday afternoon
Tusc mini bike trip	Week 2, Wednesday afternoon
Cayuga Tiylul	Week 2, Thursday afternoon
All Camp Clean Up, then Visitor's Day	Week 3, Sunday morning, then afternoon
Mass Program	Week 3, Wednesday afternoon and all of Thursday
Village day (O-Day, C-Day, S-Day, M-Day)	Week 4, Sunday, all day
Tusc bike trip	Week 4, Sunday, Monday and Tuesday, all day
Seneca Tiylul	Week 4, Monday afternoon into Tuesday morning
Mohawk Tiylul	Week 4, Tuesday afternoon into Wednesday morning

Session 2	When
No Periods, then Opening Day	Week 1, Sunday, then Monday, all day
Tusc trip	Week 1, Tuesday, all day
Taste of CSL's week	Week 1, Tuesday to Friday
Onondaga and Cayuga Tiylul	Week 2, Sunday afternoon
Seneca Tiylul	Week 2, Monday afternoon into Tuesday morning
Mohawk Tiylul	Week 2, Tuesday afternoon into Wednesday morning
Village day for every village	Week 2, Thursday, all day
All Camp Clean Up	Week 3, Sunday, period 3
Color War	Week 3, Monday and Tuesday, all day

Tusc Triathlon (the whole camp)	Week 3, Thursday afternoon
---------------------------------	----------------------------

Taste of CSL

Bunks named TC1, TC2 and so on are Taste of CSL. They are in camp for week 1 of Session 2 only.

- Their week is set, copied from 2026. The first half of the TC bunks follows one schedule and the second half the other; the two differ only on Tuesday afternoon.
- Auto generate leaves their week exactly as it is.
- Nobody else is put at a program area in a period Taste of CSL has it. They may all be there together.
- They are a village of their own, called Taste. They are not part of Tusc, even though the name starts with a T.
- Their cabins come out of Onondaga's and Cayuga's, which is why those two villages start smaller in Session 2.
- You can have more or fewer than four. Add or remove TC bunks on the Build tab in week 1.

Session 2, week 1, as the session starts: no periods Sunday, Opening Day Monday, Taste of CSL's week filled in, Tusc on its trip Tuesday.

5. Auto generate

Auto generate builds the periods from the bunks on the Build tab. It puts the session calendar on first, where it is not there yet, and builds around it and around anything you entered by hand. It reads the other weeks of the session, so each bunk's totals stay fair across the whole session.

marked yellow for you to fill, so what you get always keeps the rules.

This builds the periods from the bunks on the Build tab. The session calendar (trips, Tiyul, village day and the rest, on the Settings tab) goes on first where it is not there yet, and the periods are built around it and around anything you have entered by hand. It reads the other weeks you have loaded, so each bunk's totals stay fair across the whole session. Every time you run it you get a different valid schedule, so you can keep regenerating until you like one.

What should be generated?

☐ Just Week 1

☒ The whole session, week by week

What should happen to each week?

Week 1

Week 2

Week 3

Week 4

Options

☐ When replacing, keep Bike Trip and Tiyul where they are.

☒ Count what the other weeks already have.

☒ Leave the days that have already happened as they are (through today).

Ticked: a bunk that already had Yoga twice in a week you are keeping will not be given a third, and its visit numbers carry on from there. Unticked: the weeks you are not generating are ignored, as if this were the only schedule.

Session 1 (4 weeks), June 27 to July 23, 2027. To change it, pick the other session at the top of the page.

The Auto generate dialog, set to the whole session.

What the dialog asks

- **What should be generated?** Just Week N, or The whole session, week by week.
- **For one week that already has activities:** Keep what is there and build around it (only the empty periods are filled) or Replace what is there (the week is cleared first).
- **For the whole session, a choice for each week:**
 - **Lock:** leave it exactly as it is
 - **Build around what is there**
 - **Regenerate:** clear it and build it again

A week that is already filled in starts as Lock.

- **When replacing, keep Bike Trip and Tiyul where they are.** On to start with. Everything on the session calendar is kept the same way.
- **Count what the other weeks already have.** On to start with. A bunk that already had Yoga twice in a week you are keeping is not given a third, and its visit numbers carry on from there. Off, the weeks you are not generating are ignored.
- **Leave the days that have already happened as they are (through today).** On to start with. Once the session is under way, generating a week again only touches the days still to come, and what already happened still counts toward the totals.
- **When a village has six bunks or more,** the dialog also offers **Use the settings for big villages**, ticked. See chapter 7.

The session comes from the picker at the top of the page, not from the dialog.

While it runs

The progress panel: weeks done, where each week stands, the time so far, and Stop.

- It works in the background. You can switch tabs and weeks, look at Tracking, and download.
- Each week appears on the page as soon as it is done.
- The weeks being generated can be looked at but not changed until the run is over.
- **Stop** keeps the weeks that are already done and leaves the rest as they were.

How long it takes

A whole session usually takes a few seconds to half a minute. In our own tests on one computer, four runs of Session 1 took 5, 5, 16 and 33 seconds, and four runs of Session 2 took 6, 6, 17 and 26 seconds. A slower computer will take longer.

The app tries a week several ways at once. If none comes out right it tries again, without saying anything except "try 2" in the panel. A try lasts 15 seconds at most, and a week is never worked on for more than 45 seconds in all.

When a week will not come out

If 45 seconds pass and no version of a week keeps every rule, the app hands back the best one it found. The periods that broke a rule are emptied and given another activity where one fits; the ones nothing fits in are left **empty and marked yellow**. Nothing on the week breaks a rule. Fill the yellow periods by hand, or change a setting and generate again.

Afterwards

After a run: what was generated, and Undo.

- **Generate again as often as you like.** Every run gives a different schedule.
- **Undo** puts back every week the run made. It leaves alone anything you changed in other weeks meanwhile.
- **Undo has limits.** It only undoes the last run. It goes away as soon as you change a period by hand, upload a file, switch session, or reload the page.

6. The rules it follows

These are the rules a generated week keeps. They are written here in plain words; the app does not list them on screen.

For every bunk

- Every period has something in it. The one exception is the last Friday of Session 1, which is departure and stays empty.
- No program area twice in one day.
- No program area two days in a row. Trips do not count, and Friday into Sunday does not count.
- Nothing in period 4 and again in period 1 the next morning.
- Athletics and A&C are single periods, never a double.
- Athletics and A&C stay within two of each other over the session, and every bunk gets A&C.

For villages

- Waterfront, league, Shabbat Prep, the swim test, Tiyl and the bike trip are for the whole village at once.
- Waterfront is a double period, morning or afternoon, one village at a time.
- Nobody goes to Waterfront before the swim test. In week 1 that means not on the first morning with periods, and not before the village has swum. Mohawk takes its test during General Swim on the first day, so its Waterfront starts on the second.
- Only so many bunks of one village go to an area in one day. The number is a setting.

Sharing a period

- Only so many bunks are at an area at once. The number is a setting.
- Bunks only share with bunks they are allowed to be with (chapter 7, Who may share a period).
- Bunks that share are on the same visit number, so a bunk on its second Teva is not put with a bunk on its first. Athletics and Time with UH are the exceptions to start with.
- Time with UH and Judaics: two bunks, of the same village.
- Ropes and Yoga go by campers: bunks next to each other in a village go together as long as their campers add up to no more than the limit.

The pool

- One group at the pool in a period.
- An Onondaga or Cayuga bunk's first swims are lessons, one bunk alone. How many is a setting.
- Onondaga and Cayuga never swim together. Tusc always swims as a whole village. Seneca and Mohawk swim together only at the same age.
- Tusc's triathlon training is never in a period when someone is swimming.

The calendar and Shabbat

- Nothing on the session calendar is ever moved, and nothing you entered by hand is changed unless you chose to replace the week.
- A village has Shabbat Prep on Friday afternoon of its Shabbat week, and the extra single periods you set.
- No bunk has Music or Judaics while any village is at Shabbat Prep, because those specialists run it.
- Low Ropes comes before High Ropes.

Fairness, and short weeks

- "Twice a week" means on average over the session. A week the calendar cuts short, such as the week with Mass Program, gets fewer Waterfront and league periods.
- When the calendar leaves a bunk a good deal less room than an ordinary session, it gets as many visits as fit. It is not treated as a failure.
- Neighbours in a village are given the same areas each week, so they stay on the same visit and can keep going together.
- In week 4 of Session 1, which has the least room, three things are looser: A&C partners need not be on the same visit, three bunks of a village a day may have Athletics or A&C, and a bunk may have one more Time with UH.
- Waterfront and league may go one over their number in a week where a half-day is open and the village has room.

7. Settings reference

Settings are saved with the session and go into the Excel file. A small i beside a number says more when you point at it.

Settings

How often each program area happens and how many bunks it takes. Auto generate uses these numbers. They are saved with this schedule and go into the Excel file, so a schedule you send to someone carries its own rules.

These settings add up: the periods fit.

i

Program area	Each bunk	Bunks at once i	Bunks of one village in a day i	Same visit number i
Waterfront	about 0 3 C 3 S 3 M 3 T 3 a week i	A whole village, one village at a time		
League	at least 1 a week i , at most 2 i	A whole village, set village by village. Mohawk's are double periods. For Tusc the number is triathlon sessions.		
Pool	exactly 2 a session	Lessons alone for an O or C bunk: the first 2 swims. Most campers at once: 80		
Ropes		At most 30 campers at once i		
Hobbies	exactly 7 sessions in the whole session i	The whole camp		
In a village's Shabbat week: the Friday afternoon double always, and exactly 1 more single periods earlier that week i				
Who has Shabbat each week: Week 1 ☐ O ☐ C ☐ S ☒ M ☐ T ☐ No Shabbat				

Pointing at an i opens a short explanation.

The check at the top

The page does the arithmetic on your numbers as you change them. It says one of four things.

It says	It means
These settings add up: the periods fit.	Nothing to do.
Will come up short.	A schedule comes out, but the calendar leaves less room than the numbers ask for, so some bunks will end the session short of a few visits. Nothing has to change. Lower a number if you would rather choose what gives way.
Unlikely to work.	It adds up on paper, but settings this tight did not generate when they were tried. It says what to try.
Not possible.	The periods do not add up. It says what to try.

Every setting

Setting	What it controls	Starts at	A reason to change it
Waterfront, about _ a week	Waterfront blocks a village has in a week, on average.	2	The lake is closed part of the summer.
League, about _ a week, for each village	League periods a week. Mohawk's are double periods. For Tusc the number is triathlon sessions.	3 for every village	One village plays less often.
Pool, at least _ a week	Swims each bunk gets every week.	1	The pool is closed: set 0.

Pool, at most _	The most swims in a week. A second swim is given a whole village at a time, to the village that has swum least.	2	Keep everyone to one swim.
Lessons alone, the first _ swims	How many of an Onondaga or Cayuga bunk's first swims are one bunk alone.	2	More or fewer lessons this year.
Pool, most campers at once	The most campers in the water together, unless it is one whole village.	80	Fewer lifeguards.
Ropes, exactly _ a session	Ropes blocks each bunk gets. Low first, then High, each a double period.	2	The course is closed for part of the session.
Ropes, at most _ campers at once	Bunks next to each other in a village go together up to this many campers. One group is at ropes in a half-day, so this number decides how many bunks can have ropes in a session.	30	The Settings tab says ropes does not fit for everyone: raise it so more bunks go together.
Hobbies, exactly _ sessions in the whole session	Hobby half-days for the whole camp, in total. Every week gets its Friday morning first, then a midweek one, then Sunday mornings.	7	More or fewer hobby days.
Shabbat Prep, exactly _ more single periods	Single periods of Shabbat Prep earlier in a village's Shabbat week, on top of the Friday afternoon double.	1	A village needs more or less time to prepare.
Who has Shabbat each week	Tick the village or villages for each week, or No Shabbat.	Week 1 Mohawk, week 2 Onondaga and Cayuga, week 3 Seneca and Tusc	This summer's turns are different.
Athletics and A&C, at most _ a week	The most of each a bunk has in a week. They fill whatever periods the other areas leave.	3	Rarely.
Music, at least _ a week, at most _	The weekly Music, and how far it may go to fill a period.	1 and 2	The Music specialist is part time.
Time with UH, at least _ a session, at most _	Time with the Unit Head: what every bunk gets, and how far it may go to fill a period.	1 and 3	Unit heads want more time with bunks.

Judaics, Israel, Teva, Ceramics, Yoga: at least _ a session, at most _	"At least" is what every bunk is given. "At most" is how far it may go to fill a period that would otherwise be Athletics or A&C.	Judaics 2 and 3. Israel 2 and 2. Teva 3 and 3. Ceramics 2 and 3. Yoga 2 and 3.	A specialist is hired, leaves, or is part time. To stop using an area, set both to 0.
Dance, by village, a session, exactly	Dance is set village by village.	O 3, C 2, S 3, M 1, T 2	A village wants more or less Dance.
Bunks at once	How many bunks an area takes in one period.	Athletics 3, A&C 3, Ceramics 1, the others 2	A second specialist, or a bigger space.
Yoga, at most _ campers at once	Yoga goes by campers, like ropes: neighbours in a village go together up to this many.	20	The Yoga space holds more or fewer.
Bunks of one village in a day	The most bunks of one village an area sees in one day.	2, and 1 for Ceramics	A big village: see below.
Same visit number	Ticked: bunks that share a period there must be on the same visit. Unticked: any visit will do.	Ticked for everything except Athletics and Time with UH	An area where it does not matter who has been before.
In the last week of the session, bunks that share a period may be one visit apart	A little slack in the last week, when there is the least room to line bunks up.	Off	The last week keeps coming back with gaps.

Session 2 starts with two numbers lower than Session 1: Yoga is at least 1 and at most 2, and Dance is one fewer for every village. In Session 2 Tusc also gets Ceramics once and one ropes block, High Ropes, because it is the same campers as Session 1. Those two Tusc numbers come with the session and are not on the Settings tab.

Add or remove a program area

When someone is hired for something new, such as archery or martial arts, type its name in the last row of the table, choose its numbers, and press **Add**. It becomes an activity you can pick on the Build tab, a column on the Tracking tab, a tab in the specialist schedules, and Auto generate gives it to every bunk as single periods. Up to six can be added. An added area has a **Remove** button beside its name. To stop using an area that came with the app, set both its numbers to 0.

Who may share a period

Three choices cover most camps:

- **Inside a village:** only the bunk next to it in the list, or any bunk of the village. Starts at only the next bunk.
- **Paired villages (O with C, S with M):** may mix, or never mix. Starts at may mix.
- **Grades:** the same grade, within one grade, or any grades. Starts at within one grade.

These are for the areas where bunks may be together. Athletics takes any bunks, Tusc bunks always share with each other, and the pool keeps its own rules whatever is chosen here.

Advanced: customize sharing opens a grid with a box for every pair of bunks. A ticked box means the two may share. Tick or untick any pair; a box you change is outlined, and it stays that way whatever the three choices are set to. Pointing at a box lights up the two bunks it is for. **Undo the changes on the grid** puts every pair back.

The sharing grid. The two bunks of the box under the pointer are lit up.

The grid goes by bunk name. A bunk that is renamed starts again from the three choices.

The settings for big villages

The biggest Session 1 camp is 5 Onondaga, 6 Cayuga, 6 Seneca, 6 Mohawk and 4 Tusc. With six bunks in a village the usual numbers leave too few places, and weeks come back with empty periods. When a village has six bunks or more, the Settings tab shows a button, **Use the suggested settings**, and the Auto generate dialog offers the same thing, ticked. They are:

- 4 bunks at once at Athletics, and 2 at Ceramics.
- 3 bunks of a village a day at every area.
- Any two bunks of a village within a grade may share, not only the ones next to each other in the list.

In our tests, six whole sessions with that 27-bunk camp at 15 campers a bunk and these settings all came out complete, in 5 to 30 seconds each. With the usual numbers the same camp came back with empty periods in weeks 1 and 2. With full bunks only one fits at Yoga at a time, so expect bunks to end the session short on Yoga.

Reset to the default settings

Reset to the default settings puts every number back to what the session starts with. It does not touch the schedule. To put the schedule back as well, use **Start over**.

8. Saving, sharing and printing

Download

Button	What is in the file
Download Week N (.xlsx)	The week on screen on a tab named "Week N", a Tracking tab for that week, and the settings tabs.
Download all weeks (.xlsx)	One tab for each week that has bunks, a "Whole Session Tracking" tab, and the settings tabs.
Specialist schedules (.xlsx)	One tab for each program area, laid out like the Specialists tab. This file is for reading and printing; it cannot be uploaded back.

The settings tabs are **Settings** (one row per program area), **Main areas** (Waterfront, league, pool and the rest, and which session the file is from), **Sharing**, and, when you changed the calendar, **Calendar**.

Upload

Upload reads every "Week N" tab in a file, however many there are, and tells you which weeks it will load and which it will overwrite before it does anything. A file with settings in it brings them along and replaces the ones on screen. A file that was saved from the other session is loaded into that session, and the session on screen is kept as it is.

What comes back, and what does not

Kept through a download and upload	Not kept
Bunks: names, grades, camper counts. Every period, write-ins included. Day details. All settings. The session calendar, when it was changed. Which session it is.	The yellow marks left by the Clear tool. The chance to Undo. The Tracking and Specialists tabs are worked out again from the schedule, not read from the file.

You can edit the file in Excel or Google Sheets and upload it again. Keep the tab names and the header rows as they are.

Printing

The Schedule tab has a **Print** button. For a specialist, either print the Specialists tab from your browser, or download **Specialist schedules (.xlsx)** and print the tab you want from Excel. Landscape paper suits both.

9. Things that cannot be undone

Each of these asks before it acts, except where noted. None of them can be taken back afterwards.

Download all weeks first if there is anything on the page you might want again.

Button	What it does
--------	--------------

Start over	Empties every period of the week on screen, or of the whole session, and puts the session calendar back on. Depending on what you untick, it also puts the session's own bunks and settings back. It tells you what it will do and asks first.
Remove, at the end of a bunk's row	Deletes the bunk and its whole row. It does not ask first.
Clear, on the Build tab	Empties the periods you described. They are marked yellow, so you can see where, but what was in them is gone.
Upload	Overwrites the weeks that are in the file, and the settings if the file has them.
Fill in the biggest camp	Adds bunks to every week and sets every bunk's camper count to 15. The counts that were there are gone.
Add a bunk to O, C, S, M, T	Adds a bunk to every week of the session. It does not ask first. Remove it again week by week.
Use Week N's bunks (Build tab, from week 2 on)	Replaces the week's bunks, and clears its activities.
Reset to the default settings	Puts every setting back, including a changed calendar and the sharing grid.
Auto generate, with Replace or Regenerate	Clears the week before building it. This one has Undo , until you change something by hand.

10. Troubleshooting and questions

A week came back with yellow, empty periods.

The app could not find a version of that week that keeps every rule inside 45 seconds, so it emptied the periods that broke one. Fill them by hand, press Auto generate again for another try, or loosen a setting. If a village has six bunks, use the settings for big villages.

The Settings tab says "Will come up short".

That is information, not an error. The calendar leaves less room than the numbers ask for, so some bunks will end the session a visit or two short of something. Auto generate fits in as many as it can. Session 2 says this from the start, because it is short and Color War takes two days.

Not every bunk got ropes twice.

The camp has one ropes course, and one group is there in a half-day. A session only has so many half-days, so there is a limit to how many groups can go, however the schedule is arranged. When the bunks and the ropes settings ask for more than that, the Settings tab says so at the top: "Ropes will not come out for everyone", or "Ropes is not possible for everyone", with the number of half-days and the number of groups. It also says what to try: usually more campers at once at ropes, so more bunks go together.

When ropes does fit, every bunk gets it as often as the setting says. When it does not, everyone gets a first turn before anyone gets a second. Session 1 as it starts fits. Session 2 does not: it is three weeks with Color War in it, and has about 17 half-days for about 22 groups. The biggest Session 1 camp, 27 bunks at 15 campers each, does not fit at 30 campers at once either; at 45 it does.

The Settings tab says "Not possible" or "Unlikely to work".

The numbers ask for more than there are periods or places. The message says what to try, usually a lower "at least", or two bunks at once.

It is taking a long time.

A week is never worked on for more than 45 seconds, so a four-week session cannot take more than about three minutes. If it is slow every time, close other programs, or other browser tabs with this page open.

Stop keeps the weeks that are done.

A bunk ended up in the wrong village.

The village is the first letter of the bunk's name. A bunk called "Onondaga 3" is in village O, and so is one called "Oak". A name that starts with TC is Taste of CSL, not Tusc.

A bunk has no grade or no camper count.

The app still works. Without a grade it goes by the bunk's place in its village, and without a count it assumes 12 campers.

I refreshed the page during a run.

The run stops. The weeks that had already appeared are kept. Press Auto generate again for the rest.

I moved something on the calendar and it did not move on the schedule.

The calendar only fills empty periods. Clear the old one on the Build tab, then press **Put the calendar on the schedule now**.

Auto generate put a second Tiylul on.

It does not when the one you entered is labelled Tiylul. If you wrote it in under another name, the app cannot tell it is the Tiylul. Use the activity called Tiylul.

The schedule is gone.

The browser's saved data was cleared, or you are on a different browser or computer. Upload your last Excel file.

Something else.

Use **Contact support** at the bottom of the page.

11. Known limits

- **No login and no cloud.** The schedule is in one browser on one computer. Two people cannot work on it at once.
- **Two sessions.** Session 1 is four weeks and Session 2 is three. The dates are set for summer 2027 and cannot be changed on screen.
- **Sunday to Friday, four periods a day.** Saturday is not on the grid.

- **No phone layout.** The grid is wide. Use a laptop or desktop.
- **Day details** (R"H and LOD, TS, General Day, DOD, birthdays, EVP, notes) show on the Schedule tab but can only be edited in the Excel file.
- **The app does not know about weather, staffing or one-off events.** Enter those by hand, or add a line to the session calendar.
- **A day off for one bunk** cannot be put on the calendar. The calendar is for the whole camp or a whole village. Enter it by hand on the Build tab.
- **Tusc's own Session 2 numbers** (Ceramics once, one High Ropes) come with the session and are not on the Settings tab.
- **A hand-entered period is trusted.** When building around what you entered, the app does not check your own entries against the sharing rules.
- **Undo** only covers the last Auto generate, and only until you change something.
- **27 bunks is the most.** The camp has 27 cabins. Beyond six bunks in a village, expect yellow periods.

12. Glossary

Term	Meaning
A&C	Arts and Crafts.
Bunk	One cabin group. A row on the schedule.
Village	A group of bunks of about the same age: Onondaga (O), Cayuga (C), Seneca (S), Mohawk (M), Tusc (T). The first letter of a bunk's name.
Period	One of the four activity slots in a day. Periods 1 and 2 are the morning, 3 and 4 the afternoon.
Double period	One activity across both periods of a morning or an afternoon.
Program area	What an activity counts toward on the Tracking tab. Low Ropes and High Ropes both count as Ropes.
Visit number	Which time this is for a bunk at an area, counted from the start of the session.
League	A village's own sports league: League (Onondaga), CHL (Cayuga), SSL (Seneca), MNL or MAL (Mohawk). Tusc has triathlon training instead.
Tiyul	A village's trip out of camp.
Hobbies	A half-day when the whole camp does chosen activities: AM Hobbies or PM Hobbies.
Time with UH	Time with the Unit Head.
Teva	The Teva program area.
Shabbat Prep	A village getting ready to lead Shabbat, run by the Music and Judaics specialists.
Mass Program (MP)	A program for the whole camp that takes the place of periods.

Village day	A day a village spends together instead of at periods: O-Day, C-Day and so on.
Color War (CW)	Two days of Session 2 with no periods.
Taste of CSL (TC)	Younger campers who come for the first week of Session 2.
Session calendar	The list, on the Settings tab, of everything in a session that is not a period.
Auto generate	The button that builds the periods for you.
Build around	Generating a week while keeping what is already on it.
Yellow period	An empty period that was cleared, by you or by Auto generate, and still needs filling.
Write-in	An activity you typed that is not in the list. It is kept, and not counted in Tracking.
